A 5

Audi A5 Coupe | A5 Cabriolet

2013 Audi A5.2.0T Prestige shown in Ice Silver metallic with optional 19" 10-spoke design wheels and available Driver Assist package.

Ask them to hold your calls.

It'll be hard to get back to the office after you get your hands on the newly redesigned Audi A5. It's funny how a captivating design paired with ultraresponsive performance will make counting vacation days a favored pastime. And with a new look for 2013, we're sure the A5 will cause more than a few sick days spent to get some fresh air. Available in Coupe or Cabriolet variants, there's an A5 and a drivetrain for every driver. With the undeniable grip of available Audi quattro® all-wheel drive and your choice of three transmissions delivering dynamic response, the A5 also delivers an exhilarating driving experience. Featuring an impressive 2.0-liter turbocharged Audi TFSI® engine, you get optimized 'all-terrain' without minimizing power. It might be that you only problem when driving the A5 will be going through all of the unread e-mails when you finally make it back to the office. You might just want to stay on the road.

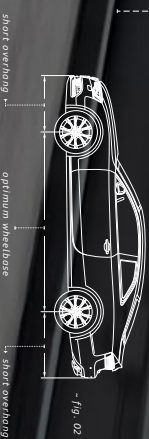

1 EPA estimate available at time of printing. Your mileage will vary.

More than just a nip/tuck job.

While most cars in its class are still playing by the same old rules, Audi is changing the game. At first glance, it's easy to see that the Audi A5 is a favorite in its class. The restyled A5 is cut from the same Audi cloth, but stitched together in an entirely new way, based on Audi Sport heritage. The A5 is an elegant take on the aggressive styling and power you've come to expect from Audi. Newly refined lines sweep across the three-dimensional hood to the rear, fusing the headlights and taillights, while the tapered Audi Singleframe grille comes on strong as a brass emblem of cool. The design of the A5 gives it a bold style and aggressive stance you won't find in many places, so you certainly won't feel stuck with an old luxury look. The double take confirms that the A5 is back and better-looking than ever.

02 - Perfect Proportions

Nothing feels out of place in an A5, and that's by design. Its streamlined body, distinctive design allows it to be aerodynamic, reducing drag and improving fuel economy. The result is a car that's not only fast, but also efficient, giving this sport car a signature aesthetic.

01 - LED Daytime Running Light Technology
 Stylish and iconic, available LED daytime running lights help enhance the minimalist look and design efficiency of the front and rear of the car.

2013 Audi A5 2.0T Premium plus shown in Ice Silver metallic with optional 19" 10-spoke design wheels.

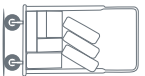

It's a matter of substance.

Since the Audi A5 is composed of some of the finest materials available in a luxury performance coupe, you know that substance is more than skin deep. The interior is artfully crafted, using the finest elements to stimulate your sight, touch and sense of smell. Beautifully stitched and wonderfully composed textures are a symbol of the uncompromising spirit that Audi embodies. Our interiors are a visual representation of the performance you've come to expect from Audi: sleek, fluid and substantively composed. It might just be where you develop that deep connection to your A5.

03 - *Panoramic Sunroof*

Another enhancement to your drive is the sleek and panoramic interior of the A5 Coupe. With 10.5 sq. ft. of sunroof glass, you'll enjoy the open sky, giving the cockpit even more headroom. If you don't mind the sun, the sun is always with you. The interior is a beautiful environment, the art and science of design. The sunroof is a great feature as well. So enjoy the view as you enjoy the free driving experience.

04 - *Split Folding Rear Seats*

With 12.2 cubic feet of cargo space in the A5 Coupe and 10.2 cubic feet of cargo space in the A5 Cabriolet with the seatbacks in the upright position, the A5 is also a great choice for your weekend adventures. The split folding 60/40 rear seatbacks of the Coupe. You can enjoy all the benefits of a sportscar and still have room for your oversized toys.

Love at first seat .

The second you decide to climb into the driver-centric cabin of the Audi A5, you can be confident you'll be fully engaged. A multifunction steering wheel has every control you need right at your fingertips, placed where they are the most intuitive to use. It may take a while to see what a pair you and the A5 make, because you've never been so coupled with a car. In fact, you'll have the same experience as other A5 drivers—never has such intimacy been felt with an inanimate object.

2015 Audi A5 2.0T Premium shown in Titanium Gray, leather with navigation, Drive Assist and Sport packages.

Another way to open it up.

Breathe in the fresh air and let the interior out. Top down, the Audi A5 Cabriolet gives you a whole new perspective on driving. No matter your drive, a brisk morning commute or a lazy sunny afternoon tour through the country, the A5 Cabriolet gives you a sense of freedom only attainable with the breeze rushing through your hair. While your neighbors may wonder why you've got the top down on a chilly morning, the available head-level heating system helps ensure your comfort even if the weather is contrary.

2013 Audi A5 Cabriolet. ©2013 Audi AG. All rights reserved. Audi is a registered trademark of Audi AG.

¹ Timelapse shown does not account for any reflect, soft-top operation and is for illustration only.

2013 Audi A5 Cabriolet 2.0T Prestige shown with Velvet Beige leather and available Comfort package.

The perfect car for European beaches.

Go ahead and go topless, they're already staring. It could be the available Comfort package that has them intrigued, with perforated Milano leather seating surfaces and ventilated and heated sport front seats. The available Audi MMI® Navigation plus system helps keep you covered even when you're not, by letting you access music, information and navigation with just a few clicks of a button. And in case you get "bashed", just bring the top back up and no one will be the wiser. But we don't think you will.

05 - Ventiladed and Heated Sport Front Seats

Some added comfort for the top-down drive along the coast are the available heated and ventilated sport seats. The available head-level heating system ventilates blow warm air directly onto your neck and shoulders.

quattro

It's a bond between your car and the road.

It's true that while the available Audi quattro® all-wheel drive may have been engineered to help drive through inclement weather and in low-traction situations, the real magic of this advanced system is how it performs in the dry. Power is distributed to all four wheels working in concert to help grip every corner while giving you the optimal amount of power delivery where and when it's needed. In other words, quattro helps enhance performance by appropriately transferring power to the necessary wheels when accelerating and turning, so you have confidence-inspiring performance when the road isn't at its best. Inclement weather aside, the really gripping story about quattro® is how it performs overall. Forging a sure bond between you, your Audi A5 and the road.¹

Confidence-inspiring
Under ideal conditions, power is 40:60 rear and front. But quattro's advanced system can become more challenging, but the system conditions itself for superior grip and control.

Torque vectoring
It's a handling feature that seems to respond to you in places before you're even in the driver's seat. The quattro® all-wheel drive system works with the quattro® while driving the track, cornering the line.

Torque split
When receiving input of 2.0 liter, 40 to 60% of the power is mechanically shifted to the rear wheels, while it's best allocated to propel the vehicle to drive. Once traveling in a straight line again, the 40:60 power distribution the quattro® delivers to the maximum torque to drive forward.¹ gives you

¹ When driving on a road, safety is always the number one priority. It's important to always wear your seat belt, and to never drink and drive. Always use proper driving techniques, and to never drink and drive. Always use proper driving techniques, and to never drink and drive.

Express yourself out there.

With four different modes expressing your individual driving preferences, the exclusive Audi drive select system available in the Audi A5 helps give you the ability to adjust the vehicle's steering, throttle response, and transmission shift characteristics. It helps you articulate how you want your A5 to respond to the drive. The four modes of Audi drive select cover the full spectrum of driving and road conditions. So whether driving on a winding country road or a busy interstate, there is a mode that helps your vehicle respond the way you want it to. Since the roads you drive are not always optional, we think how you choose to drive them should be.

- Comfort mode

Perfect for when the perfect roads, this setting adds optimized steering and a clear, more relaxed drive.

Comfort

- Dynamic mode

More precise steering and a more responsive throttle give this setting an aggressive feel and focused performance.

Dynamic

- Auto mode

The best of both worlds, aided to automatically adjust settings for a seamless combination of comfort, driving style and road conditions.

Auto

- Individual mode

Then turn your right-hand side automatically adjust settings for a throttle and transmission upshifts to your style.

Individual

steering engine transmission

06 - Electric Power Steering

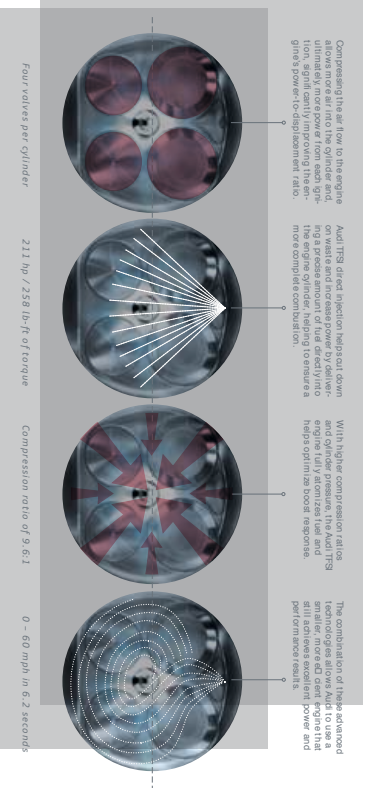

The electro-mechanical power steering combines precision and control with the available sport-tuned suspension, but requires considerably less energy than a full electric system, due to its less complex design. Removing the power steering pump helps reduce parasitic drag, resulting in additional efficiency.

1. EPA estimate not available at time of printing. Your mileage will vary.

2013 Audi A5 2.0T Prestige shown in Icos Silver metallic with optional 19" 10-spoke design wheels.

We've resolved to lose the extra weight.

It's fairly simple to explain. Since we've exploited lightweight technology, excessive horsepower is a thing of the past. We're building lighter engines that not only allow for better performance, but also an increase in fuel economy. The four-cylinder 2.0-liter Audi TFSI® engine that produces 211 hp and an impressive 258 lb-ft of torque with its direct injection and d-dent turbocharging technology is leading the way. The combination of a lightweight engine and the wide spread of the gear ratios within each of the available transmissions makes for an exhilarating driving experience at every turn.

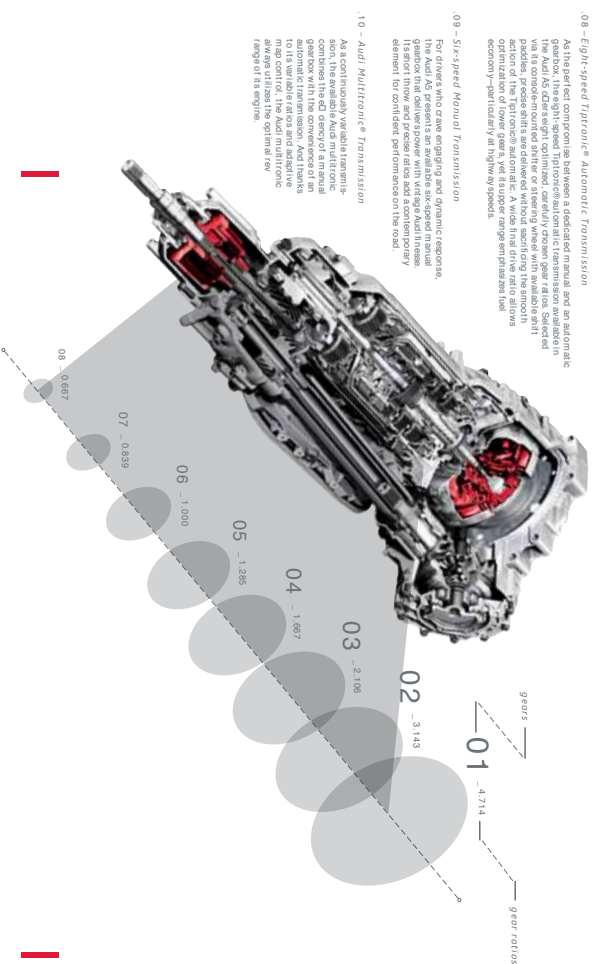

07 - 2.0 Turbocharged four-cylinder

Next ahead of the competition, this 2.0-liter turbocharged TFSI® engine combines the Audi V6's wide torque range with the TFSI® direct injection and turbocharging for more power and greater efficiency.

Stay tuned for a dynamic transmission.

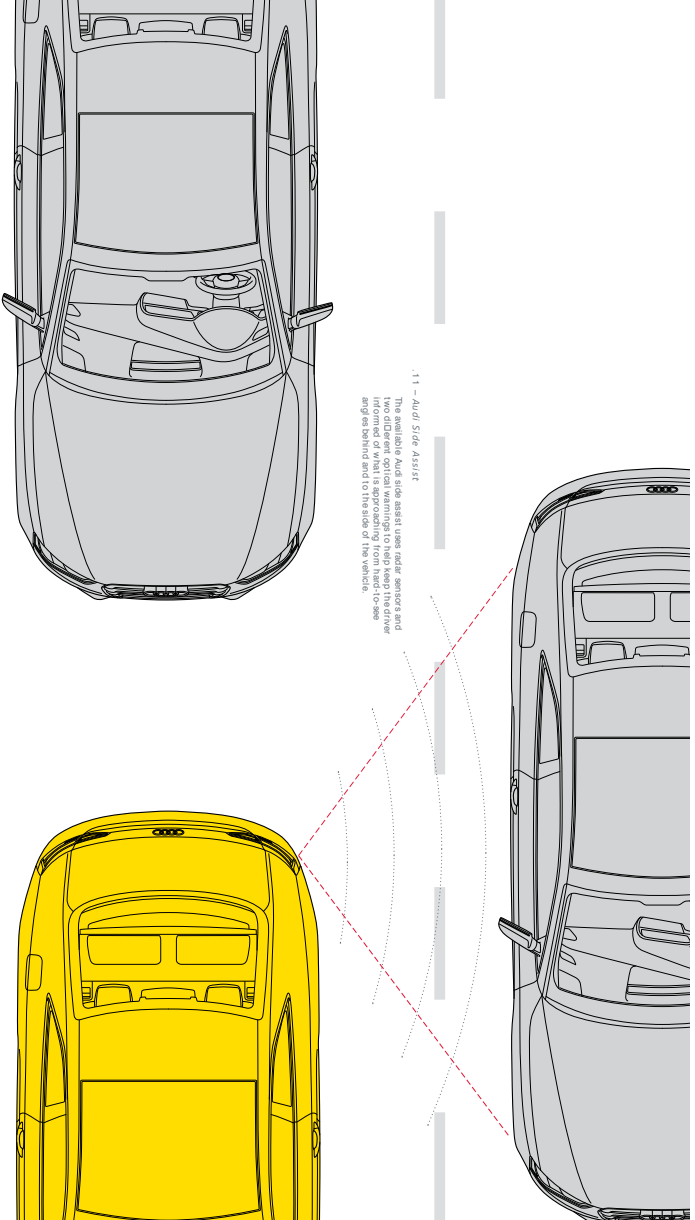

Many drivers mistakenly blame their engines for poor acceleration, when it's actually the transmission that isn't rising to the occasion. The Audi A5 eliminates the problem with revolutionary transmissions. By utilizing optimized gear ratios, each one of the three available transmissions is capable of delivering engine power in the most responsive and efficient way possible. On models equipped with automatic transmissions, drivers are able to command upshifts or downshifts through the available steering wheel-mounted shift paddles. A shift has been made and the choice is yours: choose what propels your A5.

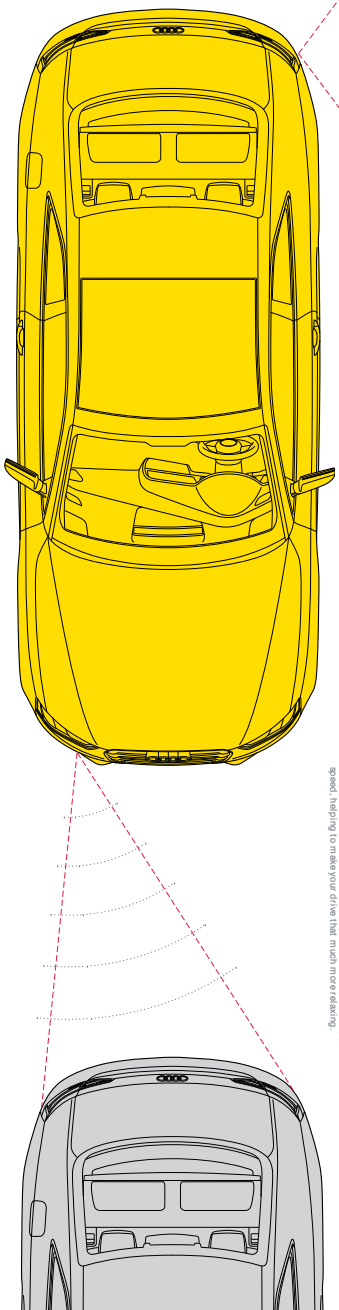

Anticipating needs you didn't know you had.

Available driver-assistance technologies take into account the actions of other drivers—while making your drive a little easier. From seemingly sentient Audi adaptive cruise control to Audi side assist, the Audi A5 has incorporated innovative, anticipatory technologies that don't see your future so much as help change it.

1.1 - Audi Side Assist
The available Audi side assist uses radar sensors and cameras to monitor the blind spot area and inform you of what is approaching from hard-to-see angles behind and to the side of the vehicle.

1.2 - Audi Adaptive Cruise Control
Ever you has their own comfort zone. The available Audi adaptive cruise control maintains a set distance from the vehicle ahead and behind you, using a special long-range radar sensor. The system constantly monitors the space between your vehicle and the vehicle ahead and behind to clear. The vehicle automatically resumes the previously preset speed, helping to make your drive that much more relaxing.

Face it — you're surrounded.

Just about everywhere you look in and around the Audi A5, there is safety at the ready, whether it's airbags that respond differently based on your seating position, or the crumple zones that give way to help mitigate potential injury in a collision. Laser-seam welding joins multiple strength levels of steel to help ensure that your Audi is built with the integrity you deserve—because we know we're protecting precious cargo.

13 — Pop-up Roll-Over Bars

In the unlikely event that your A5 Chevrolet flips over, two roll-over bars deploy from hidden compartments in the rear, and the reinforced A-pillars up front, all help protect passengers in 118 different ways. We keep the safety energy as high as possible for your safety.

14 — Airbags*

Sensors mounted in the front seats monitor your seating position to help ensure that the additive front airbags will deploy in the event of a collision. Driver and passenger front airbags are positioned to help protect your head and neck. Side-impact body protection, while knee-level airbags help keep legs down below. The A5 Coupe even has two rows of SideGuard® head curtain airbags for an added level of protection.

15 — Crumple Zones*
Audi engineers have designed crumple zones in the front of the car to help absorb and dissipate the energy and force of a collision.

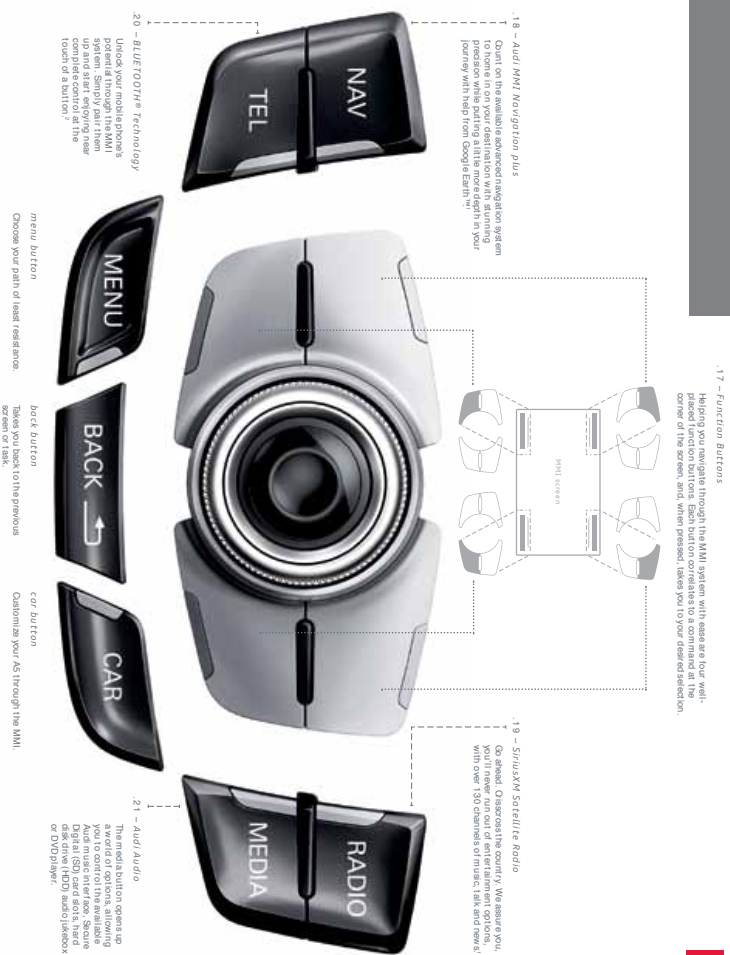

16 — Tailor-made Blanks*
Developed to make the best possible use of the body's potential, tailor-made blanks use a special manufacturing process that helps strengthen the upper zone of the body and is located in the lower zone in the event of a side collision.

* Always use supplemental restraint systems, and will not deploy under all crash circumstances. Always use safety belts and seat children in the rear, using rear seat belt system appropriate for their size and age.

The functional equivalent of installing a brain in your car.

Nothing in your Audi A5 was built in isolation. What we mean is that design, engineering and technology were conceived as a seamless whole, that they are all integrated and functional. You can see that philosophy fully represented in the available Audi MMI® system. Simply put, it's an intuitive system that intimately connects you to almost every facet of the vehicle. It's the nerve center of your vehicle, allowing you to control virtually every interior function of your A5 with a simplified source control button system. From the Audi MMI Navigation plus, to the radio, to media, the MMI helps you access information with a few easy clicks. You can even pair your compatible BLUETOOTH® enabled phone with the system for added convenience. We think of these things so you can think about how good your drive feels.

1. See installation/Technology section of the featured Content Page for important information regarding Audi Navigation plus and required SiriusXM subscriptions. 2. Requires compatible phone.

No one connects you the way we do.

We set out to change how people interact in and out of their automobiles. A suite of available technologies has made the Audi A8 a true champion of progress. And with Audi connect™ with Google Earth™, imagery and Wi-Fi connectivity for up to eight passenger devices, you have multiple ways to stay connected. You can also access information and navigate entirely with your voice in just a few commands. With that kind of access, Audi helps build on your incredible life while helping enhance your ownership experience.

1. Distraction driving can cause a road vehicle control. The features and technologies discussed above are designed for convenience, and should be used only when it is safe and appropriate. The Wi-Fi hot spot feature is intended for passenger use only. Always pay careful attention to the road, and do not drive while distracted. Features may require additional installation or subscription. Always use seat belts and avoid alcohol consumption. For more information on the features and services, please visit Audi.com. © 2011 Audi AG. All rights reserved.

We've orchestrated a new way of listening.

Dedicated to the idea of "honest music reproduction," Bang & Olufsen® is a sound engineer's dream. Through an available 505-watt, 14-speaker system perfectly integrated within your Audi A5 Coupe, Bang & Olufsen® is set on music reaching your ears by transcending the limits of audio technology. Audi offers an available system that remains how you experience sound itself: by automatingly adjusting volume and timbre balance to changing ambient noise levels, and that is deep, layered and perfect ly tuned by engineers who want you to hear the truth about how good life can sound in your A5.

14 *speakers*

12 *speakers*
A5 Cabriolet

22 - Concert Hall Effect

When a speaker detects the direction that sound is coming from, only when a high frequency tone is used, speakers are working in tandem with high- and mid-range speakers. Since the ear cannot detect the motion of lower frequency or bass notes, a single subwoofer can't provide the same level of realism. The Concert Hall Effect is a special 11th experience aimed here you've might take you.

2013 Audi S5 Prestige shown in Ice Silver metallic.

- ENGINE // 3.0-liter supercharged TFSI® V6 engine developing 333 hp and 325 lb-ft of torque
- DRIVE TRAIN // Audi quattro® all-wheel drive, available sports differential, six-speed manual transmission or an available seven-speed DHT® S Tronic® dual-clutch transmission
- CHASSIS // S5-tuned sport suspension, available Audi drive select and dynamic steering
- BRAKES // 13.6" ventilated front disc brakes with S5 logo, 13.0" ventilated rear disc brakes
- PERFORMANCE // Top track speed of 155 mph¹; acceleration from 0 to 60 in 4.9 seconds (Coupe) and 5.3 seconds (Sedan)

23 - LED Taillight Technology

Steak and sizzle, these new light-emitting diodes are brighter and longer-lasting than traditional taillights. And, the LED light signature is a faster than traditional taillights, which can help give the driver behind you more time to respond.

- fig. 03

Make your dream come truer.

The Audi A5 has a big brother called S, and since the A5 is already on the varsity team, this is like making the star championships. With more power than you would expect, the Audi S5 features a supercharged 3.0-liter Audi TFSI® engine that produces 333 hp and 325 lb-ft of torque. The S5 brings a little more to an already stunning redesign, and you'll know it as soon as you engage the throttle—You'll experience the heart of Audi Sport® performance cars. The S5-tuned sport suspension helps exploit already dynamic performance, and responsive brakes help make every commute an exhilarating experience. It's the car you've dreamt about, but now, it really keeps you up at night.

² These are optional and vary in body their manufacturer's high performance tires are designed to optimize performance and handling when driven on dry pavement. They may not maintain road grip, steering, or weather conditions. If you drive on wet pavement, these tires may not provide the same level of performance and handling as tires designed for wet pavement. These high performance tires also have a lower aspect ratio of the tread and performance handling; however, in order to avoid tire rim or wheel damage, it is important that the inflation pressure is regularly checked and maintained at optimal levels. Please also remember in making your selection that, while these tires do deliver responsive handling, they may also result in more road noise than other options. Finally, these tires may have a tendency to spin in curves.

1. ShruXKM Shellie and Trid 2 subscriptions and separately or as a package are not available in select markets. Subscription is governed by Standard Customer Agreement (www.audi.com) and its supplemental terms. You can opt out of ShruXKM Trid 2 Shellie or ShruXKM Trid 2 services at any time. In the United States, you can opt out of ShruXKM Trid 2 services at any time by contacting 1-800-829-2237.

We've given style more style.

Think of it like this—we've put the S in style. The Audi S line® package available on the Audi A5 Prestige is more than just taking an already impressive vehicle and transforming it visually to look like no other car on the road; it's mostly because it's just more of everything. With 19" 5-spoke wheels, S line front and rear fascias, and rocker panels that were designed to give the A5 S line a more vigorous look, we've added a bit of an edge to an already stylish statement. Available for both the A5 Coupe and Cabriolet, you'll need to get used to the attention, no matter which A5 you drive. Inside, Brushed Aluminum decorative inlays pepper the center console, doors and instrument panel, and they just might catch the gleam in your eye when you see them. A 11 at-bottomed three-spoke multifunction steering wheel and S line upgraded sport front seats with perforated Alcantara® leather seating surfaces enhance the prestige of this premium aesthetic, and athletic package.

2013 Audi A5 2.0T Prestige shown in Brilliant Red with the available Audi S line® and Driver Assist packages.
